Nuclear Nanticoke? Not so fast.

To: Norfolk County Council, Haldimand County Council, Legislature of Ontario, the Honourable Diane Finley and the Honourable Toby Barrett.

Without any formal public consultation, County Councils in both Haldimand and Norfolk have unanimously endorsed the first step in building two nuclear reactors.

The nuclear power industry has failed to address public concern over the issues of safety and security in the storage and handling of hazardous radioactive spent fuel.

Nuclear power is not emissions-free with its pollution intensive activities in uranium mining, transportation and refining.

No nuclear project has ever come in on budget or on time with the taxpayer and the utility customer paying for cost overruns that typically range in the billions of dollars.

We, the undersigned citizens, demand a complete moratorium on nuclear development until the issues of contamination, costs, security, and public consultation are adequately addressed.
